# Solar Heated Swimming Pools

## *The Right Choice for Your Family*

*“The pool was so warm at the end of September we had steam rising from it one evening!”*

— Mary Holland,  
homeowner, Maryland

A rooftop solar system installed on this **OREGON** home significantly reduces energy costs and provides the heat needed to keep this pool a comfortable temperature.

## *Comfortable.*

Install solar heating for your pool, enjoy the perfect water temperature, and lengthen your swimming season.

## *Economical.*

Heat your pool with the free and renewable energy from the sun. It is one of the most economical forms of energy available today and a wise choice for you. Your power pump and the power of the sun are all the energy you need.

## *Reliable.*

Enjoy your nearly maintenance-free solar system. Many manufacturers offer 10 to 15 year warranties.

## *Clean & Safe.*

Make the right choice for your family. Solar heated pool systems produce clean, non-polluting energy. They are safe for our environment, safe for plants and animals and safe for all of us.
